

Target Practice

The Game

Archers need a bow and an arrow. They concentrate, aim and fire in the hopes of a bulls-eye.

You will be the arrow in the game of archery.

Play the game with a variety of question types and activity cards.

Players

The size of the group determines how often each player has a turn. 3 – 5 players is a good number to enjoy the game. Each person can compete with the others, or 2 players can compete against 2 others.

Game

Each group stands in a corner of the room. Each corner has a target. The first person (Tom) begins by closing his eyes. He walks toward the target, pointing his finger in front of him.

The number on the circle he touches will determine his or the team's score if he can answer the question or complete the activity.

Material

- Easel paper to draw the targets
- Question and activity cards

Targets

Target Practice

A “normal” target has the highest points in the middle or bull’s eye

A dartboard is a creative alternative

You can also use a different form:

5	1	4	3	1	2
1	6	1	2	3	4
2	3	1	5	1	1
4	1	3	1	1	6
6	4	5	1	2	1

Alternatives

As a variation, place the target on the floor and have the players throw a coin to determine the points scored.
